October is Pizza Month

October 2015

Pizza is one of America's favorite foods. It's a great combination food typically combining meat, dairy, grains and vegetables. Since pizza can be high in calories and fat, *Pizza Ideas* on the back has suggestions on how to make your pizza healthier. You can limit the number of slices you eat by adding a lettuce salad or fruit to your meal. The young and those young at heart enjoy pizza and it can be easy and fun to make.

Did you know:

- About 251,770,000 pounds of pepperoni are consumed every year in the U.S.
- 93% of Americans say they have eaten pizza in the last month!
- Top 5 days for pizza sales: Super Bowl Sunday, Halloween, the day before Thanksgiving, New Year's Eve and New Year's Day
- Thin crust pizza is enjoyed by 61% of Americans, 14% prefer deep-dish
- People in the U.S. eat 100 acres of pizza/day or 350 slices/second. That is a lot of pizza!
